

Profile

M.Sc. Industrial Mathematics student with software development experience in simulation tooling, numerical methods, and compiler-related projects. Contributed to Infineon’s in-house analog circuit simulator, working with Verilog-A functionality in a large C++/Fortran codebase. Interested in summer internships in software engineering, scientific computing, EDA tools, compilers, simulation software, and mathematically oriented systems.

Education

NTNU – Norwegian University of Science and Technology	Trondheim, Norway
M.Sc. / Civil Engineer (Sivilingeniør), Industrial Mathematics	Expected Spring 2027
NTNU – Norwegian University of Science and Technology	Trondheim, Norway
B.Sc., Electrical and Electronics Engineering	2020 – 2023

Experience

Infineon Technologies	Dresden, Germany
Software Developer Intern – TITAN Simulation Software	Oct 2025 – Mar 2026
- Contributed to TITAN, Infineon’s in-house analog circuit simulator, within a large production C++/Fortran engineering codebase. - Worked on Verilog-A functionality close to SPICE-like simulation workflows, model integration, and circuit simulation tooling. - Gained experience reading, debugging, and extending complex scientific/engineering software.	
Trondheim Kommune	Trondheim, Norway
Support Worker / Støttekontakt	Jan 2022 – Jan 2023
Provided regular one-to-one support through structured social, educational, and leisure activities.	
Posten AS	Central Norway
Logistics / Distribution	Aug 2015 – Jul 2019
Worked in logistics and distribution with responsibility for reliable, time-sensitive delivery work.	

Selected Technical Work

VAMSC – Verilog-AMS Compiler	Early-stage C++20 compiler for Verilog-AMS, including source management, diagnostics, lexer/parser structure, AST construction, semantic analysis, and a vams check frontend driver.
C++20 CMake Compiler architecture Parser/sema Diagnostics	
AFEM – Adaptive Finite Element Project	Numerical computing project focused on adaptive finite element methods, numerical approximation, computational methods, and scientific software structure.
Finite elements Numerical PDEs Scientific computing	
Mathematical Notes & Book Project	Book-style mathematical notes focused on clear technical explanation and structured presentation of mathematical and numerical topics.
LaTeX Numerical methods Mathematical communication Technical writing	

Technical Skills

Languages	C++, Fortran, Python, C, MATLAB, Java, JavaScript/TypeScript, LaTeX
Scientific Computing	Numerical methods, finite elements, differential equations, data processing, visualization
Simulation / EDA	Verilog-A, SPICE/circuit simulation concepts, model integration, simulation tooling
Software Engineering	Git, CMake, Linux/macOS tooling, debugging, large codebases, technical documentation
Compiler Tooling	Lexing/parsing, ASTs, semantic analysis, diagnostics, command-line tools

Leadership & Additional Experience

Studentersamfundet i Trondhjem – Volunteer, Markedsføringsgjengen / Redaksjonen	Spring 2025 – Autumn 2026
Contribute to editorial and social media work for a student organization with approximately 100,000 total followers across accounts.	
Norwegian Armed Forces / HMKG – Medic	2016 – 2017
Served as a medic in His Majesty the King’s Guard, building composure, responsibility, and practical judgment.	
Norges Håndballforbund – National Federation Referee	Jan 2013 – Present
Referee at national level in Norwegian handball, requiring rapid decisions, clear communication, and calm leadership under pressure.
